Project

Student Attendance Monitoring System | C#, Windows Forms

- **Developed** a student attendance system to record and monitor daily attendance, **improving** record organization and tracking.
- **Implemented** attendance validation and report generation features, **ensuring** accurate data management.
- **Designed** a user-friendly interface, **enhancing** usability for administrators.

Express Seat Reservation System | PHP, Html, CSS, JavaScript, MySQL

- **Built** a web-based seat reservation system to manage passenger bookings, seat assignments, and reservation records, **streamlining** the booking process.
- **Integrated** input validation and booking management features, **improving** data accuracy and reducing duplicate reservations.
- **Generated** reservation summaries and booking records, **enhancing** record organization and operational efficiency.

Clinic Management System | PHP, Html, CSS, JavaScript, MySQL

- **Created** a web-based clinic management system to manage patient records, appointments, and medical information, **improving** record organization and accessibility.
- **Implemented** patient registration and appointment scheduling features, **streamlining** administrative workflows and reducing manual data entry.
- **Optimized** the user interface for clinic staff, **enhancing** usability and improving access to patient information.
